- #10 diameter designed for fastening plywood to 12-8 gauge metal.
- Wafer head provides flush-fit with increased load bearing for added strength.
- Reamer wings designed to keep wood from splitting and helps countersink the head.
- Dagger Ultra-Guard Coating provides superior corrosion resistance and is approved in ACQ treated wood.

- Designed for fastening wood to metal (12-000 gauge).
- Reamer wings designed to keep wood from splitting and helps countersink the head.
- Dagger-Guard Coating provides excellent corrosion resistance.
- Flat head for countersunk wood applications where very low profile head is desired.
- Shank slot for optimum threading performance.
