

IT'S ABOUT TIME

Introducing the EZ1™

Contractors have waited long enough for a floor drain and cleanout that's easy to install and built for the long haul. Zurn's EZ1 - available in cast iron and plastic - ships as a ready-to-install system, allows for post-pour adjustment with an integrated strainer, provides job-site flexibility and maintains ongoing reliability. Don't hesitate. Make the EZ choice.

A SPEEDY SETUP

Sold complete and ready to install, EZ1 is an intuitive product that saves contractors time and money. We've gone the extra mile to spare you a step or two with a system that's user friendly and - compared to similar products - simple to integrate.

DESIGNED TO RUN LIKE CLOCKWORK

EZ1's integrated engineering, which includes an easy post-pour adjustment and tilt accessory package, delivers high-level functionality and requires minimal skill to install or maintain. Unlike our competitors, EZ1's strainer is built into the assembly and lifts with the PC cover to ease contractor labor.

LONG-TERM DURABILITY

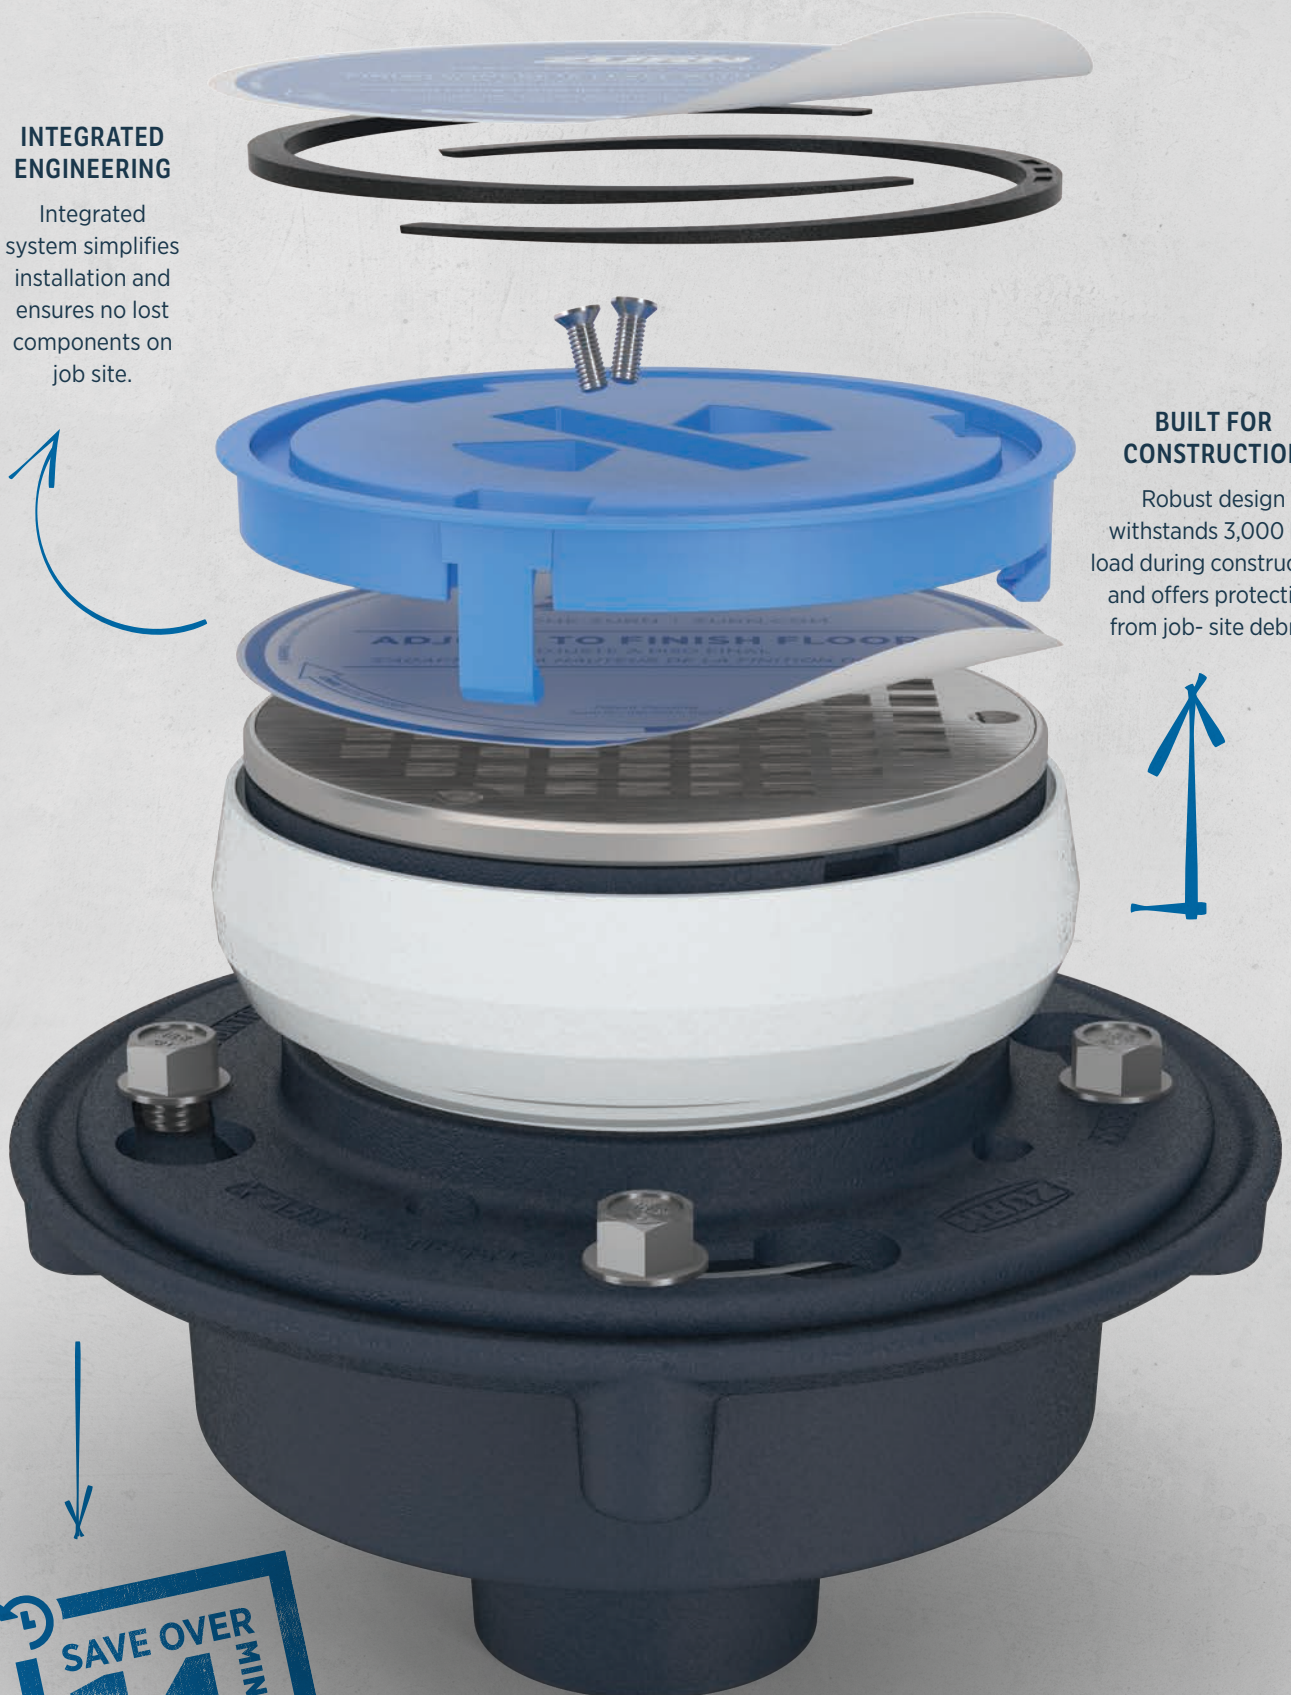

Whether Cast Iron or Plastic, EZ1 is crafted to stand up against wear and tear over the product's lifecycle. It continues the Zurn tradition of adding value, building trust through superior knowledge, reducing difficulty and placing the customer first.

INTEGRATED ENGINEERING

Integrated system simplifies installation and ensures no lost components on job site.

BUILT FOR CONSTRUCTION

Robust design withstands 3,000 lbs load during construction and offers protection from job-site debris.

LABOR SAVING

Save 14 minutes per installation by utilizing EZ1 technology.

Skip the Trips

The drain comes preassembled and ready to install. No more running out to get tools or search for missing parts.

Adjust and Align in No Time

Shim kit comes handy, so you can get the drain straightened and aligned without hassle.

Skip a Step or Two

Stop fumbling with that duct tape and razor blade. The protective sticker keeps your drain covered, yet can be easily peeled away when ready.

Level and Leave

Post-pour adjustment and tilt correction engineering allows you to realign for the perfect slope.

14 Minutes Ahead of the Competition

Learn how the EZ1 family stacks up against the competition.

	Sioux Chief	Oatey	ZURN
Cover Removal	✓ Upside down pliers and rotation motion.	✗ Pliers grip and “pulling up” motion.	✓ Cover is removed via upside down pliers and rotation motion.
Finish Installation	✗ Strainer is located separate from drain which adds steps, wasting time.	✗ Integrated, but recessed in drain, requiring additional step.	✓ Strainer is attached to cover, allowing strainer to raise as cover is removed, eliminating a step and saving time.
Tilt Adjustment	✗ Shim kits are available, but not standard.	✗ Leveling kits are available, but not standard.	✓ Shim kits come pre-packaged in cover and are included as standard with drain.
Cover Loading	✓ 3,000 lbs	✗ No load rating available.	✓ 3,000 lbs
Protective Grate Sticker	✓ Standard	✗ Not available	✓ Standard

ZShield™ Barrier Trap Seal

Discover the paired performance of the ZShield and EZ1 Technology.

The ZShield minimizes evaporation, preventing odors, gases, and insects from entering up through the drain. Universally designed to easily be installed in almost any floor drain.
